WORK EXPERIENCE

Technical Product Manager

T-Mobile | 2022 - Present

- Coordinate 30+ developers across 4 teams creating new eCommerce capabilities for T-Mobile and Metro domains
- Implement the Metro Add a Line project, which brings in ~$30k a day in revenue since launch
- Align stakeholder visions and priorities by creating and prioritizing epics, stories and product roadmaps
- Use agile methodologies to create end to end experiences through ideation, epic/story writing, UX design, development, testing and deployment
- Help UX create mocks in Figma and assist devs with CSS when teams are shorthanded
- Analyze, forecast and report on burn-down rates, story statuses and project pacing

Product Manager

Brainshark | 2022

- Work with customers, stakeholders, designers and developers located around the world to plan and implement features for sales enablement analytics.
- Update UI/UX design processes to implement changes more efficiently
- QA new features before deployment and log issues in Jira
- Create documentation to standardize processes, train customers, and onboard new employees
- Use competitor market research and internal data to make data driven decisions

Project Manager II

Microsoft | 2021-2022

- Coordinate technical and business requirements with teams in India, The Netherlands, Brazil and Germany.
- Work with Coursera, Pluralsight, Udacity and other online learning platforms to develop courses, resources and certifications for Microsoft Azure.
- Create and analyze performance reports using Power BI and Excel.
- Research potential partners, draft business plans for new collaborations and set up contracts to expand our business.
- Meet with partners biweekly to share data and ensure course quality.

Technical Product Manager

Obsessedly | 2019-2021

- Work with a team of 4 developers
- Assist in debugging and developing obsessedly.com using React.js, Next.js, Snowflake and Firebase
- Create roadmaps for obsessedly.com in Jira based on feedback from internal and external customers
- Use data from Snowflake, Google Analytics, Google Ad Manager and Google Tag Manager to ideate and strategize new features
- Review and deploy code using Github and Heroku

Project and Content Manager

HowStuffWorks, System1 | 2016-2019

- Interview, hire, train and manage 110+ freelance writers, editors, image editors and translators to create 200+ unique content pieces per week, complying with Google and Facebook policy requirements and copyright law.
- Use Jira, Slack and Asana to communicate with three offices and multiple teams to coordinate A/B tests, prioritize internal tooling improvements, log bugs and address user feedback.
- Use Tableau, Amazon Redshift, Google Analytics and Google Ad Manager to analyze the performance of 20,000+ pieces of content across three sites and guide week-by-week content production.

Product Planner

K2 Sports | 2013-2015

- Manage production and sales across four product lines: Line Skis, Madshus Skis, K2 Helmets and K2 Goggles.
- Use Excel to calculate purchase volume, monitor costs and production numbers, manage inventory, oversee production schedules and forecast for capacity planning.
- Coordinate with 13 factories, engineers and K2 international to get products built and shipped in line with production forecasts.
